Project Deats

At NotJustCode, we decided to create the most fully featured recording application because we couldn't quite find the perfect recording app to fit all our needs, such as:

- Recording
- Folders for different recordings, for example, a person could have their grocery list folder, a school folder, a music folder, and so on.
- The ability to search for any recording within a specific folder or throughout the app.

So we decided to build an app with all these functionalities, and more.

Scrum

Current scrum date: March 14th to March 31st

Completed:
- Play/Pause/Stop buttons and functionality
- Popup and slider
- Delete and renaming the recording
- Ability to use the search header

Current Scrum Work items:
- App universal searching
- Folders

Status: Yellow

Individual Work - MJ

Search functionality

- Parse actual recording names through search fields
- create the algorithm for both global search and local search

Individual Work - Shafiq

Organizational Features

- List structure
- Pop up menu button

Next

- Folder structure
- Delete and Rename function

Individual Work - Azeezat

Recording

- Renaming and deleting
- Pop up bugs

Design

- User friendliness

Project Issues/Changes

Bugs

- Default naming of the recording

We're still in progress but we'll look out for any persistent issues.

Changes: At this time, we have no changes.

Project Demo

Next up

- Completing the organizational and universal search functionalities
- Testing

Team Reflection

On track?
Yellow.

Good progress?
The recording part works.

Barriers to our success?
There are some things we can't really achieve with dart/Flutter especially with the file directory access but we are trying to work our way around it.

Questions or concerns?
No questions as of now.

Any Questions?
