# 1.

## STORY

# STORY

As students who record multiple times a day. Finding recordings can become really difficult. We found that the current state of recording applications couldn't allow users rename, search and organize their recordings. When we'd find a good app that offered anyone of these features it would be lacking in others.

# 2.
# PROBLEM

PROBLEM

# 3.

# THE COMPLETE RECORDER

# THE COMPLETE RECORDER

At NotJustCode we decided our own app that would help solve these basic needs and even more. Our app is built around three core experiences.

» **High quality recordings**
» **Search**
» **Recording organization**

All future features added to our app will build on these core experiences.

# 4.

# TARGET AUDIENCE

# TARGET AUDIENCE

**Our targets are the everyday people ranging from:**

- » **Students**
- » **Singer/Songwriters**
- » **Instrumentalists**
- » **Choir**
- » **Etc.**

» **DevOps**

# PROJECT
# DEMO

# FUTURE IMPLEMENTATIONS

## Folder

Implement folder functionality instead of lists that can be connected with local and global search implementation.
## Speeding and Slowing

Being able to speed or slowing down recording during the playback.

## Trim and cut

Trimming, cut and save the intended recording as a brand new recording.

## Stop and Resume

Being able to continue a recording from the previous one instead of making a brand new recording.

# THANKS FOR LISTENING!
