Project Deats

At NotJustCode, we decided to create the most fully featured recording application because we couldn't quite find the perfect recording app to fit all our needs, such as:

- Recording
- Folders for different recordings, for example, a person could have their grocery list folder, a school folder, a music folder, and so on.
- The ability to search for any recording within a specific folder or throughout the app.

So we decided to build an app with all these functionalities, and more.

Scrum

Current scrum dates: February 20th - March 13th

Last Scrum Work items
- Refactoring, recording

Current Scrum Work items
- Working separately on
  - Recording bugs
  - Organizational functionalities
  - Search
- Documentation

Status: Yellow-green

Individual Work - MJ

Search functionality

Completed

- Animated back button that takes user to the previous location
- A clear button that clears the users text field when they type
- The keyboard pop up when a search is initiated

Future plans

- To parse actual recording names through search fields
- To create the algorithm for both global search and local search

Individual Work - Shafiq

Organizational Features

- List structure
- Pop up menu button

Next

- Folder structure
- Delete and Rename function

Individual Work - Azeezat

Recording bugs

Design

- ● User friendliness
- ● Beautiful

Project Issues/Changes

Bugs

- The recording plays, but doesn't pause or stop in the middle of playback
- The recording list shows differently on android than ios; works better on ios than on android

We're still in progress but we'll look out for any persistent issues.

Changes: At this time, we have no changes.

Project Demo

Next up

- MVPs and making our application functional
- User Interface
- Testing

Team Reflection

On track?
Yellow-green.

Good progress?
The recording part works.

Barriers to our success?
We just need to keep pushing.

Questions or concerns?
Nothing so far.

Any Questions?
